## Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

## How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-3350), facsimile: (613) 951-2848 or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(780) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020

## Ordering/Subscription information

### All prices exclude sales tax

Catalogue no. 62-004-XPB, is published monthly as a standard paper product for \$25.00 per issue or \$83.00 for twelve issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for twelve issues.

Please order by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at (613) 951-7277 or 1 800 700-1033; by fax, at (613) 951-1584 or 1 800 889-9734; or by Internet, at [order@statcan.ca](mailto:order@statcan.ca). For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-3350), télécopieur : (613) 951-2848 ou à l'un des centres de consultation régionaux de Statistique Canada :

## Renseignements sur les commandes et les abonnements

### Les prix ne comprennent pas les taxes de vente

Le produit n° 62-004-XPB au catalogue paraît mensuellement en version imprimée standard au coût de 25 \$ le numéro ou 83 \$ pour 12 numéros au Canada. À l'extérieur du Canada, le coût est de 25 \$US le numéro ou 83 \$ US pour 12 numéros.

Veuillez commander par la poste, en écrivant à Statistique Canada, Division de la diffusion, Gestion de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6; par téléphone, en composant le (613) 951-7277 ou le 1 800 700-1033; par télécopieur, en composant le (613) 951-1584 ou le 1 800 889-9734; ou par Internet, en vous rendant à [order@statcan.ca](mailto:order@statcan.ca). Lorsque vous signalez un changement d'adresse, veuillez nous fournir l'ancienne et la nouvelle adresses. On peut aussi se procurer les produits de Statistique Canada auprès des agents autorisés, dans les librairies et dans les bureaux régionaux de Statistique Canada.

## Normes de service à la clientèle

Statistique Canada s'engage à fournir à ses clients des services rapides, fiables et courtois et dans la langue officielle de leur choix. À cet égard, notre organisme s'est doté de normes de service à la clientèle qui doivent être observées par les employés lorsqu'ils offrent des services à la clientèle. Pour obtenir une copie de ces normes de service, veuillez communiquer avec le centre de consultation régional de Statistique Canada le plus près de chez vous.

## Note of appreciation

*Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

## Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

## Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» – «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

**Note to readers**

This is the last issue of the Farm Input Price Index (FIPI) in its present form and of this publication, Catalogue no. 62-004-XPB. The future index will be reduced, calculated only for Eastern and Western Canada once a year. The next index will be available at the beginning of the next year on CANSIM® (Canadian Socio-Economic Information Management System) – Statistics Canada's computerized data bank).

**Note aux lecteurs**

Cette parution des prix des entrées dans l'agriculture est la dernière dans ce format ainsi que dans cette publication, no. 62-004-XPB au catalogue. L'indice sera réduit et calculé annuellement pour l'est et l'ouest du Canada. Le prochain indice sera disponible au début de l'an prochain sur CANSIM® (Système canadien d'information socio-économique) – banque de données informatisée de Statistique Canada).

## Highlights

### Farm Input Price Index

#### First quarter 1999

Higher prices for feeder cattle pushed the all-Canada Farm Input Price Index up 0.5% in the first quarter of 1999 compared with the previous quarter. This is the first quarterly increase in the total index since the third quarter of 1997.

On an annual basis, however, declining prices in five of the nine input categories pushed the national index down 2.1% compared with the same period a year earlier. Lower prices for inputs into animal production contributed most to this decrease. Farmers in the East benefited more from the lower prices than their western counterparts.

First quarter 1999 figures include estimated indexes for farm rent and property taxes. At the national level, the index for farm rent was estimated to have increased 0.6% and the property tax index 1.4%. Also, in this quarter, all indexes for the last two years were revised. The indexes for 1997 are now considered final.

#### Higher prices for feeder cattle contributed most to the quarterly increase

Nationally, higher prices for feeder cattle (+4.0%) and grain feed (+1.6%) contributed most to the quarterly increase.

In addition to higher prices for property taxes and farm rent, farmers also faced higher prices for machinery and trucks. These increases, however, were partially offset by lower prices for gasoline (-6.4%) and diesel fuel (-5.3%).

On the other hand, the most significant decline on a quarterly basis occurred in the crop production component, the result of lower prices for seed (-1.5%). Also, farmers paid less for hired farm labour and for heating fuel (-4.5%), both the main contributors to the quarterly decrease in supplies and services.

The preliminary interest figures indicate that the cost of mortgage interest fell 0.8% over three months, which resulted in a slight decrease in the overall cost of interest.

#### Feed prices down significantly on an annual basis

Lower prices for prepared feed (-15.4%) contributed most to the year-over-year decrease.

## Faits Saillants

### Indice des prix des entrées dans l'agriculture

#### Premier trimestre de 1999

Sous la poussée des prix des bovins d'engraissement, l'Indice des prix des entrées dans l'agriculture à l'échelle du Canada a progressé de 0,5 % au premier trimestre de 1999 par rapport aux trois mois précédents. Il faut remonter au troisième trimestre de 1997 pour observer une progression de l'indice d'ensemble pour un trimestre.

Pour l'année, toutefois, des baisses de prix dans cinq des neuf catégories d'entrées ont infléchi l'indice national de 2,1 % par rapport à la même période d'un an plus tôt. La baisse de prix des entrées dans l'élevage d'animaux est le facteur qui a contribué le plus à la diminution pour l'année. Les agriculteurs de l'Est ont profité davantage du recul des prix que leurs homologues de l'Ouest.

Les chiffres du premier trimestre de 1999 comprennent des estimations des indices pour le loyer agricole et l'impôt foncier. À l'échelon national, on estime que l'indice pour le loyer agricole a progressé de 0,6 % et que celui de l'impôt foncier a augmenté de 1,4 %. De même, au cours de ce trimestre, tous les indices des deux dernières années ont été révisés. Les indices pour 1997 sont désormais considérés comme finals.

#### La hausse des prix des bovins d'engraissement est le principal facteur de la progression trimestrielle

À l'échelon national, la hausse des prix des bovins d'engraissement (+4,0 %) et des céréales fourragères (+1,6 %) a été le principal facteur de la progression trimestrielle.

En plus des hausses de l'impôt foncier et du loyer agricole, les agriculteurs ont été confrontés à une hausse des prix des machines et des camions. Toutefois, ces hausses ont été partiellement effacées par des baisses de prix de l'essence (-6,4 %) et du carburant diesel (-5,3 %).

Par ailleurs, le recul le plus net, en chiffres trimestriels, est survenu dans la composante des cultures agricoles, résultat d'une baisse de prix des semences (-1,5 %). De même, le fait que les agriculteurs ont payé moins cher leur main-d'œuvre agricole salariée et une baisse de prix du combustible de chauffage (-4,5 %) ont été les facteurs qui ont contribué le plus au recul des prix des fournitures et des services au cours du trimestre.

Les chiffres provisoires des intérêts révèlent que le coût des intérêts hypothécaires a diminué de 0,8 % au cours des trois derniers mois, ce qui a provoqué un léger recul du coût global des intérêts.

#### Baisse sensible des prix des aliments en chiffres annualisés

La baisse des prix des aliments préparés (-15,4 %) est le facteur qui a contribué le plus au repli d'une année à l'autre.

Farmers also paid less for inputs into crop production due, in large part, to lower prices for seed and nitrogen fertilizers. Lower prices for heating fuel (-12.5%) and telephone services (-4.7%) were the main contributors to the annual decrease in the supplies and services index.

The preliminary figures indicate that farmers paid slightly less interest, as a result of lower costs for mortgage loans.

Farmers faced higher prices for machinery (+4.8%), trucks (+2.5%) and automobiles (+0.8%) on a year-over-year basis. Again, these were partially offset by lower prices for gasoline and diesel fuel. Farmers also paid more for hired farm labour than in the first quarter of 1998.

### Prices lower for farmers in the East

In the East, farm input prices fell 2.8% on an annual basis, largely due to tumbling prices for prepared feed (-16.8%). Farmers also benefited from lower prices for weanling pigs, egg-producing chicks and grain feed, but faced higher prices for feeder cattle (+16.2%) and artificial insemination (+4.0%) compared with the same period a year earlier.

Price declines in heating fuel and building materials helped offset increases in the cost of interest, hired farm labour and the farm-rent estimate on an annual basis.

In the West, farmers benefited from lower prices for prepared feed (-13.3%) but not to the same extent as their eastern counterparts. Along with lower prices for seed and heating fuel, farmers in the West paid less for the cost of interest, due to lower costs for mortgage loans (-6.1%) and for building materials. This helped push down the annual building and fencing index on a year-over-year basis.

Similar to the previous quarter, farmers in the West faced higher prices for machinery but these were offset by lower prices for gasoline and diesel fuel. Farm wages rose slightly and the cost for property taxes and farm rent were also estimated to be higher compared with the same period a year earlier.

Les agriculteurs ont aussi payé moins cher les entrées dans les cultures agricoles, en raison, dans une large mesure, de la baisse des prix des semences et des engrais d'azote. La baisse de prix du combustible de chauffage (-12,5 %) et des services téléphoniques (-4,7 %) a été le principal facteur du recul de l'indice de fournitures et des services pour l'année.

Les chiffres provisoires montrent que les agriculteurs ont payé un peu moins en intérêts, conséquence de la baisse des coûts des prêts hypothécaires.

Les agriculteurs ont dû faire face à des hausses de prix des machines (+4,8 %), des camions (+2,5 %) et des automobiles (+0,8 %) d'une année à l'autre. Là encore, ces hausses ont été partiellement effacées par les baisses de prix de l'essence et du carburant diesel. Les agriculteurs ont aussi payé plus cher leur main-d'oeuvre agricole salariée qu'au premier trimestre de 1998.

### Baisse des prix pour les agriculteurs de l'Est

Dans l'Est, les prix des entrées dans l'agriculture ont chuté de 2,8 %, en chiffres annualisés, surtout à cause de la dégringolade des prix des aliments préparés (-16,8 %). Les agriculteurs ont aussi profité d'un recul des prix des porcelets sevrés, des poussins destinés à la ponte et des céréales fourragères, mais ils ont dû faire face à des hausses de prix des bovins d'engraissement (+16,2 %) et de l'insémination artificielle (+4,0 %) par rapport à la même période d'un an plus tôt.

Des baisses de prix du combustible de chauffage et des matériaux de construction ont contribué à faire contrepoids aux hausses du coût des intérêts et de la main-d'oeuvre agricole salariée et de l'estimation du loyer agricole en chiffres annualisés.

Dans l'Ouest, les agriculteurs ont profité d'une baisse de prix des aliments préparés (-13,3 %), mais pas autant que leurs homologues de l'Est. Outre la baisse des prix des semences et du combustible de chauffage, les agriculteurs de l'Ouest ont profité d'une baisse du coût des intérêts, attribuable à une diminution des coûts des prêts hypothécaires (-6,1 %) et des matériaux de construction, ce qui a contribué à infléchir l'indice des bâtiments et des clôtures d'une année à l'autre.

Comme au trimestre précédent, les prix des machines ont augmenté dans l'Ouest, mais la hausse a été épongée par une baisse des prix de l'essence et du carburant diesel. Il y a eu une légère augmentation des salaires agricoles et on a estimé que le coût de l'impôt foncier et du loyer agricole était en hausse par rapport à la même période d'un an plus tôt.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) Certains items.

(3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

## TECHNICAL NOTES

### FARM INPUT PRICE INDEX (1986=100)

#### 1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

#### Index formula

A general formula for an index made up of several items for the current period ( $I_{t/0}$ ) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where  $p_t$  is the price of an item in the current period, and  $p_o$ ,  $q_o$  and  $p_o q_o$  are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

## NOTES TECHNIQUES

### INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

#### 1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

#### Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ( $I_{t/0}$ ) est la suivante:

où  $p_t$  est le prix de l'article au cours de la période courante,  $p_o$ ,  $q_o$  et  $p_o q_o$  représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t/p_o)w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the “w” is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, “w” est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

### Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

### Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

### Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

### Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

## Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

## Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

## Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

## Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

## Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

## Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en œuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

**For further information**

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

**Renseignements additionnels**

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

# GET Connected

Internet users now can link up to **Information on Products and Services (IPS)**, Statistics Canada's newly expanded on-line catalogue.

Up-to-date and complete, **IPS** is a fully searchable listing of all current Statistics Canada publications, research papers, electronic products and services. It is the most extensive reference source available on all of Statistics Canada's information assets.

As part of our World Wide Web site, the **IPS** connects users to more than 2,000 entries documenting the full range of Statistics Canada products and services. With **IPS**, you find what you want, when you want it. Whether you're searching for the latest census information, health sector tables or news-breaking economic reports, **IPS** has it listed.

Not sure exactly what you're looking for? No problem! **IPS** features a powerful **search tool** that locates thematically related products and services in a matter of seconds. Just type in the word that fits best and the system will point you to the sources where information is available. It's that easy.

## YOUR INTERNET ACCESS ROUTE TO STATISTICS CANADA DATA

To start your search, go to "Products and Services" and then click on "Catalogue". Simple on-screen directions will guide you along.

As you will see, **IPS** provides you with key information on Statistics Canada releases: who to contact for customized data retrievals, what you can download either **free of charge** or at cost, and how you can obtain what you see listed on-screen. **IPS** also highlights time-saving features of the products and services we sell from our nine reference centres across Canada. It's the kind of information you need most when making those important purchase decisions.

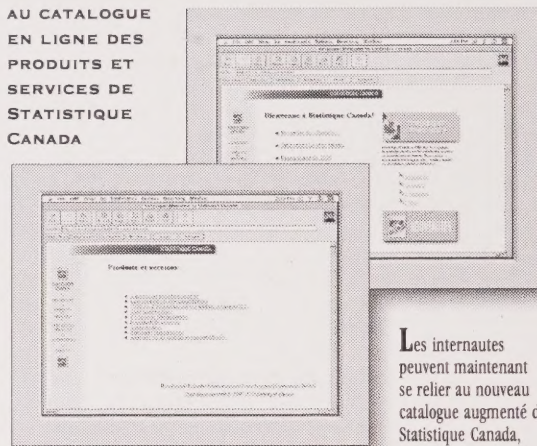

The Statistics Canada Web Site "is full of interesting facts and figures. There is no better place to get the big picture on the Canadian economy."

— David Zgodzinski  
The Globe and Mail

Visit our Web site **TODAY** and discover how easily **IPS** can work for you.

# Branchez- VOUS

AU CATALOGUE  
EN LIGNE DES  
PRODUITS ET  
SERVICES DE  
STATISTIQUE  
CANADA

Les internautes peuvent maintenant se relier au nouveau catalogue augmenté de Statistique Canada, **Information sur des**

**produits et services (IPS)**. À jour et complet, **IPS** offre une liste détaillée et facile à consulter des documents de recherche, produits électroniques, services et publications actuels de Statistique Canada. Il constitue la source de référence la plus complète sur les fonds d'information de l'agence.

Accessible à partir de notre site Web, **IPS** relie les utilisateurs à plus de 2 000 entrées décrivant la gamme complète des produits et services de Statistique Canada et leur permet de trouver ce qu'ils cherchent au moment où ils en ont besoin. Quelle que soit l'information recherchée, renseignements du plus récent recensement, tableaux sur le secteur de la santé ou rapports d'actualité sur l'économie, vous la trouverez dans **IPS**.

Vous ne savez pas exactement ce que vous cherchez? Aucun problème! **IPS** offre un **outil de recherche** puissant qui permet de repérer en quelques secondes les produits et services associés à un thème particulier. Il suffit de taper le mot qui décrit le mieux l'information recherchée pour que le système vous indique les sources où elle figure. C'est tout aussi simple que cela.

## VOTRE CHEMIN D'ACCÈS INTERNET VERS LES DONNÉES DE STATISTIQUE CANADA

Pour commencer votre recherche, choisissez «Produits et services» puis cliquez sur «Catalogue». Des directives simples à l'écran vous aideront à naviguer.

Vous constaterez que **IPS** offre des renseignements essentiels sur les produits offerts par Statistique Canada : personne-ressource pour l'adaptation des extractions de données, ce que vous pouvez télécharger **gratuitement** ou moyennant des frais, comment obtenir les produits ou services qui figurent dans la liste à l'écran. **IPS** vous fait aussi gagner du temps en vous présentant les points saillants des produits et services vendus dans nos neuf centres de consultation au Canada. C'est le genre d'information essentielle dont vous avez besoin pour prendre des décisions d'acquisition importantes.

Le site Web de Statistique Canada «regorge de faits et chiffres intéressants. Aucune autre source n'offre une meilleure perspective globale sur l'économie canadienne.»

— David Zgodzinski  
The Globe and Mail
